HOW TO USE THE COLOUR

Mixing ratio	1	1	2
	colour 30 g	cream base 30 g	activator 60 g
Example of mixture			
Processing time	35 minutes		

Prepare the colour mixture by weighing the colour, cream base and activator, following the above mixing ratio. **Processing time: 35 minutes.** Processing time can be extended according to hair type, if required. A NEW COLOUR guarantees optimum results even on **high percentage of white hair:** for example, a 4,0 on 100% white hair will be a 4,0. Eg: 100% white hair, target colour 4,0, please apply: 30 g A New Colour 4,0 + 30 g cream base + 60 g Activator 20 vol: 35 minutes processing time. A New Colour **Natural Intense** nuances provide a more intense white hair coverage and are particularly useful in cases of **resistant white hair.** For optimum results, it is recommended to use Natural Intense nuances only when more 50% of white hair is present and with 20 volume Activator. **Retouch - Regrowth** Prepare the colour mixture by weighing the colour, cream base and activator, following the above mixing ratio. Apply the mixture on the regrowth area. **Proprocessing time: 35 minutes.** Minimum loss of level /reflect intensity: add a little water and emulsify the colour on to lengths and ends for 5 minutes, after standard processing time. Moderate loss of level /reflect intensity: prepare the colour mixture with A New Colour Activator 10 vol and apply uniformly to lengths and ends for 10 minutes during standard processing time. Considerable loss of level /reflect intensity: prepare the colour mixture and apply uniformly to lengths for 15 - 35 minutes during standard processing time.

HOW TO USE THE BOOSTER 000

It is not advised the use of A New Colour Booster 000 when more than 50% white hair is present. A New Colour Booster 000 when mixed with A New colour shades, cannot be used with A New Colour Activator 10 and 20 vol.

Mixing ratio	0.5	0.5	1	2
	colour 15 g	booster 000 15 g	cream base 30 g	activator 30 o 40 vol 60 g
Example of mixture				
Processing time	35 minutes*			

*Processing times are indicative and can be extended in case of thick hair that is difficult to treat. **In the case of resistant hair:**

- with A New Colour Activator 30 vol you can achieve up to 2 levels of lightening.
- with A New Colour Activator 40 vol you can achieve up to 3 levels of lightening.

In case of fine hair or natural base above 5:

- with A New Colour Activator 40 vol you can get up to an 1,5 levels of extra lightening (up to 4,5 levels).

WARNINGS

This product must not be used for dyeing the eyelashes or eyebrows. Rinse eyes immediately if product comes into contact with them. For professional use only. Wear suitable gloves. Keep out of reach of children. To obtain the desired performance, **the three components must always be mixed together as indicated.**

SKIN TEST

It is always advisable to carry out a skin sensitivity test 48 hours before applying colour, as described in the leaflet inside every box of A New Colour, to avoid any allergic reactions.

HOW TO USE PURE COLOUR

The Pure Colour range offers six permanent cream colours (red, yellow, green, blue, violet, orange) without ammonia, fragrance or unpleasant odour. They are extremely easy to mix with the Cream Base and A New Colour Activator 5 vol. Used on bleached or lightened hair to provide intense colouring (mixing ratio A for intense vibrant colours 1:1:2), or a pastel colour if diluted (mixing ratio B for intense pastel colours 0.5:1:2 or C for pastel colours 0.1:1:2, etc. ...).

A	Mixing ratio	1	1	2
	Example of mixture	pure colour 30 g	cream base 30 g	activator 5 vol 60 g
B	Mixing ratio	0.5	1	2
	Example of mixture	pure colour 15 g	cream base 30 g	activator 5 vol 60 g
C	Mixing ratio	0.1	1	2
	Example of mixture	pure colour 3 g	cream base 30 g	activator 5 vol 60 g
	Processing time	35 minutes		

Pure Colour blue	Pure Colour violet	Pure Colour green	Pure Colour yellow	Pure Colour red	Pure Colour orange

BLEACHING POWDER

A New Colour bleaching powder is a low volatile, ammonia and persulphates free bleaching powder that can lighten up to 7 levels with A New Colour Activators 5 vol, 10 vol, 20 vol and 30 vol.

HOW TO USE

A New Colour Bleaching powder is recommended for all types of highlighting techniques. **Prepare the mixture according to personal preference and to desired consistency:** 1:2 - 1:3 (powder: activator) using exclusively A New Colour Activators **5 vol, 10 vol, 20 vol or 30 vol.**

For a controlled lightening action, depending upon choice of activator. As a guide:

5 volume - up to 2 levels of lightening
10 volume - up to 3 levels of lightening
20 volume - up to 5 levels of lightening
30 volume - up to 7 levels of lightening
40 volume - not to be used

Timing depends upon degree of lightening required, check regularly. Development time: up to 40 minutes. Use of a heat source NOT advised.

Mixing ratio	1	from 2 to 3
	bleaching powder	activator
